

CCC EXECUTIVE COMMITTEE, MAY 8, 2015

Bill Halsey, Margaret Murphy, Nancy Navaretta, Ellen Andrews, Sheila Amdur, Karyl Lee Hall, Rep. Susan Johnson, Sheila Amdur

Sheila noted purpose of meeting was to discuss future emphases for CCC, based on the Committee's charge to focus on people with complex health care conditions on Medicaid. (Not discussed would be the issue as we move into other population areas, we may want to add other stakeholders to the Committee.)

Ellen raised issue of care planning—presentation on universal assessment/comprehensive care plan process now underway at DSS—who is using it, how is it being evaluated, what is interoperable, are ASOs using this and/or ABH, how does DDS fit into this? Who doesn't it apply to? What is road map from universal assessment to care plan? Present at June meeting. Overlapping care plans for different populations being seen by many of the same providers

Sheila asked if there is an overview of Medicaid populations broken out by high utilizers and diagnoses and geographical area. VO has focused on high utilizers and CHN also has. May not be same definition used by both ASOs. How do they integrate their efforts? What efforts have been undertaken with presentations on these going forward? Have a series of presentations on populations with complex health care conditions including individuals with developmental disabilities.

Margaret raised what would happen to JEN data project and how data is used? JEN could do another profile on high utilizers on Medicaid, utilization, costs.

June 19 meeting agenda:

1. First half hour on duals—Will we have new projected Care Management rates at this point?
2. ASOs present for 30 minutes each on high utilizers with summary of interventions—These presentations should be population/diagnosis specific.
3. Roll out over time focus highest cost populations with complex health care conditions, what interventions are happening, how universal assessment/comp care plan overlays/what are system issues (also long term care initiatives, including Dawn Lambert initiative related to people with substance use issues in nursing facilities)/impediments. Also review of autism spectrum population at some point in future.
4. July meeting related to long term care planning, outcomes and costs/Blum Shapiro report
